

# Test Bank For The Human Body in Health and Disease 8th Edition, All Chapters 2023 latest 100% Graded

6. The heart is an example of a(n)

- a. organ.
- b. tissue.
- c. organism.
- d. system.

ANS: A                      PTS: 1                      DIF: Application      REF: p. 6  
TOP: Structural levels of organization

7. The levels of organization from most simple to most complex are

- a. cell → chemical → organ → tissue → system.
- b. tissue → cell → chemical → organ → system.
- c. chemical → tissue → cell → organ → system.
- d. chemical → cell → tissue → organ → system.

ANS: D                      PTS: 1                      DIF: Memorization  
REF: p. 5                      TOP: Structural levels of organization

8. When using directional terms to describe the body, it is assumed that the body is in what position?

- a. Supine
- b. Anatomical
- c. Lateral
- d. Prone

ANS: B                      PTS: 1                      DIF: Memorization  
REF: p. 7                      TOP: Anatomical position

9. The supine position

- a. describes the body lying face up.
- b. is also called anatomical position.
- c. describes the body lying face down.
- d. both A and B.

ANS: A                      PTS: 1                      DIF: Memorization  
REF: p. 7                      TOP: Anatomical position

10. The prone position

- a. describes the body lying face up.
- b. is also called the anatomical position.
- c. describes the body lying face down.
- d. both B and C.

ANS: C                      PTS: 1                      DIF: Memorization  
REF: p. 7                      TOP: Anatomical position

11. Because humans walk upright, the term *dorsal* can be used in place of the term

- a. inferior.
- b. posterior.
- c. anterior.
- d. distal.

ANS: B                      PTS: 1                      DIF: Memorization  
REF: p. 7                      TOP: Anatomical direction

12. The opposite term for *posterior* in humans is
- superior.
  - anterior.
  - ventral.
  - both B and C.

ANS: D                      PTS: 1                      DIF: Application      REF: p. 7  
TOP: Anatomical direction

13. The opposite term for *superficial* is
- deep.
  - inferior.
  - posterior.
  - medial.

ANS: A                      PTS: 1                      DIF: Memorization  
REF: p. 7                      TOP: Anatomical direction

14. The body section that divides the right ear from the left ear is a \_\_\_\_\_ section.
- frontal
  - sagittal
  - coronal
  - transverse

ANS: B                      PTS: 1                      DIF: Application      REF: p. 9  
TOP: Planes or body sections

15. The body section that divides the nose from the back of the head is a \_\_\_\_\_ section.
- frontal
  - sagittal
  - midsagittal
  - transverse

ANS: A                      PTS: 1                      DIF: Application      REF: p. 9  
TOP: Planes or body sections

16. A section that divides the body into mirror images is a \_\_\_\_\_ section.
- frontal
  - coronal
  - midsagittal
  - transverse

ANS: C                      PTS: 1                      DIF: Application      REF: p. 9  
TOP: Planes or body sections

17. The two major body cavities are called
- thoracic and abdominal.
  - thoracic and pelvic.

- c. dorsal and ventral.
- d. mediastinum and pleural.

ANS: C                      PTS: 1                      DIF: Memorization  
REF: p. 9                      TOP: Body cavities

18. The liver can be found in the
- a. upper right quadrant.
  - b. epigastric region.
  - c. hypogastric region.
  - d. both A and B.

ANS: D                      PTS: 1                      DIF: Application      REF: p. 10  
TOP: Body cavities

19. The word “leg” correctly describes the
- a. area from the hip to the foot.
  - b. area from the knee to the ankle.
  - c. area between the hip and the knee.
  - d. femoral area.

ANS: B                      PTS: 1                      DIF: Memorization  
REF: p. 13                      TOP: Body regions

20. The human body tries to maintain a constant body temperature. This is an example of
- a. homeostasis.
  - b. a positive feedback loop.
  - c. an effector.
  - d. a sensor.

ANS: A                      PTS: 1                      DIF: Application      REF: p. 14  
TOP: The balance of body functions

21. The part of a feedback loop that has the direct effect on the regulated condition is called
- a. homeostasis.
  - b. the effector.
  - c. the sensor.
  - d. the control center.

ANS: B                      PTS: 1                      DIF: Memorization  
REF: p. 14                      TOP: The balance of body functions

22. The part of the feedback loop that detects a change in the regulated condition is called
- a. homeostasis.
  - b. the effector.
  - c. the sensor.
  - d. the control center.

ANS: C                      PTS: 1                      DIF: Memorization  
REF: p. 14                      TOP: The balance of body functions

23. The part of the feedback loop that compares the present condition within a body part or region to its homeostatic condition is called
- homeostasis.
  - the effector.
  - the sensor.
  - the control center.

ANS: D                      PTS: 1                      DIF: Memorization  
REF: p. 14                      TOP: The balance of body functions

24. When your body temperature drops below normal, your muscles begin to contract rapidly, making you shiver and generating heat. In this case your muscles are acting as the
- sensor.
  - effector.
  - control center.
  - both A and C.

ANS: B                      PTS: 1                      DIF: Synthesis                      REF: p. 14  
TOP: The balance of body functions

25. Which of the following body functions is an example of a positive feedback loop?
- Maintaining a pH of 7.45 in the body
  - Forming a blood clot
  - Uterine contractions during labor
  - Both B and C

ANS: D                      PTS: 1                      DIF: Application                      REF: pp. 15-16  
TOP: The balance of body functions

26. The level of organization that precedes the organ level is the \_\_\_\_\_ level.
- system
  - cellular
  - tissue
  - chemical

ANS: C                      PTS: 1                      DIF: Memorization  
REF: p. 5                      TOP: Structural levels of organization

27. Which of these terms cannot be applied to a body in the anatomical position?
- Dorsal
  - Posterior
  - Supine
  - Both A and B

ANS: C                      PTS: 1                      DIF: Memorization  
REF: p. 7                      TOP: Anatomical position

28. Which term means *toward the head*?
- Anterior
  - Superior
  - Superficial

d. Ventral

ANS: B

PTS: 1

DIF: Memorization

REF: p. 7

TOP: Anatomical direction

29. Which describes the anatomical relationship of the wrist to the elbow?

- a. The elbow is proximal to the wrist.
- b. The elbow is distal to the wrist.
- c. The elbow is superficial to the wrist.
- d. The elbow is lateral to the wrist.

ANS: A

PTS: 1

DIF: Application

REF: p. 7

TOP: Anatomical direction

30. A coronal plane or section is another term for a \_\_\_\_\_ plane.

- a. sagittal
- b. midsagittal
- c. transverse
- d. frontal

ANS: D

PTS: 1

DIF: Memorization

REF: p. 9

TOP: Planes or body sections

31. The muscular sheet called the diaphragm divides the

- a. right and left pleural cavities.
- b. thoracic cavity and abdominopelvic cavities.
- c. abdominal and pelvic cavities.
- d. thoracic cavity and mediastinum.

ANS: B

PTS: 1

DIF: Memorization

REF: p. 9

TOP: Body cavities

32. Which is not a part of the upper abdominopelvic region?

- a. Right hypochondriac region
- b. Epigastric region
- c. Hypogastric region
- d. All of the above are part of the upper abdominopelvic region.

ANS: C

PTS: 1

DIF: Memorization

REF: p. 10

TOP: Body cavities

## MATCHING

*Match each term with its corresponding definition or description.*

- a. Chemical level
- b. Cellular level
- c. Tissue level
- d. Organ level
- e. System level
- f. Organism

1. The smallest “living” part of the body
2. A word used to denote a living thing
3. Level that includes atoms and molecules
4. Level made up of groups of tissues working together to perform a task
5. Level that is the most complex unit within the organism
6. Level that is made up of a group of cells working together to perform a task

- |           |  |                   |

## SHORT ANSWER

1. Explain the difference between anatomy and physiology.

ANS:

Answers will vary.

PTS: 1 DIF: Memorization REF: P. 3  
TOP: Introduction

2. Name and explain the structural levels of organization of the body and give an example of each.

ANS:

Answers will vary.

PTS: 1 DIF: Application REF: pp. 5-6  
TOP: Structural levels of organization

3. Describe the anatomical position.

ANS:

Answers will vary.

PTS: 1 DIF: Memorization REF: p. 7  
TOP: Anatomical position

4. Define or explain the words “prone” and “supine.”

ANS:

Answers will vary.

PTS: 1 DIF: Memorization REF: p. 7  
TOP: Anatomical position

5. Name and describe the three planes or body sections.

ANS:

Answers will vary.

PTS: 1 DIF: Memorization REF: p. 9  
TOP: Planes or body sections

6. Name the two major body cavities, and describe what is in each.
